Communicate and apply computational processes to solve problems and offer solutions.

**Languages:** (Int.) CSS, HTML, Java, JavaScript, (Beg.) Python

**Frameworks and Libraries:** (Int.) React, Redux, Saga, jQuery, Ajax, NPM, (Beg.) Nodejs

## EXPERIENCE

**Front-End Developer | Consumer Insights Research (Chongqing, China) | Dec 19 – Jan 20**

- Created a shipping route visualization website from scratch that was pitched to investors two weeks into incubation.
- Optimized and managed large pool of data to maintain a friendly and responsive user interface.

**CS1101S Teaching Assistant | NUS | Aug 19 – Nov 19**

- Led a tutorial class to reinforce and consolidate concepts discussed during lecture.
- Nominated by 4 out of 8 students for a Teaching award.
- Offered one-on-one consultations with students to build a supportive learning environment.

**Front-End Testing | Source Academy | May 19 – Jul 19**

- Performed frontend testing on the Source Academy website that serves 600 staff and students per year.
- Added functional components to improve intuitive usability of the website using JS React framework.

**Tutor | Math Vision and Private | Jan 18 – Nov 18**

- Tutored Secondary and Junior College students in Mathematics, Physics and Chemistry in preparation for O level, A level and IB exams.
